

Photography and Video Policy

Photography and videography are occasionally used by T30gym to promote the club and share success and achievements in class and at competitions. It may also be appropriate to use videos as a valuable coaching aid during training.

Photos may be displayed on T30gym social media pages (Facebook and Instagram) and on the club website. Consent will be obtained from Parent/ Carer prior to any photos or videos taken.

Class registers are taken on devices belonging to the Senior Coaching team, **and occasionally used as useful coaching aids?** but coaches will not use their personal devices to take photographs of club members.

Parents/ Carers should NOT take photos or videos during classes. If Parents/ Carers wish to take a photo or video of their child in a particular area of the gym, please ask one of the coaching team at the end of the session to avoid other club members being included in the photo/ video.

Gymnasts and Parents need to understand the risks and the possibility of negative consequences to sharing images, and care should be taken regarding identifying or 'tagging' individuals in images/ videos.

Any concerns should be reported to: admin@t30gym.com / Emma Walsh ...Welfare officer. Further guidance can be found on the following links:
